Education

University of Arkansas | Fayetteville, AR

B.S. in Supply Chain Management, Minor in Enterprise Resource Planning (ERP) | Graduating May 2027

Certifications: McKinsey Forward Program (McKinsey & Company) · AI Fluency: Framework & Foundations (Anthropic) · Constraint & Bottleneck Management (LinkedIn)

Professional Experience

Labrie Environmental Group | Supply Chain Analyst Intern | May 2025 – Present

Trade Strategy & Cost Savings

- Identified a supplier pricing discrepancy in hydraulic fittings through independent spend analysis and built cost models uncovering \$1.2M in annual savings (67% category spend reduction), mobilizing a cross functional sourcing, logistics, and engineering team to execute the supplier transition, now in production following FAI/FBI approvals.
- Led Section 232/301 tariff impact analysis across 400+ global vendors and HTS codes, identifying strategic exclusions (steel addendums, USMCA, etc.) to convert tariff exposure into cost avoidance.
- Audited USMCA qualification across ~50 bills of materials spanning U.S., Canada, and Mexico plants, extracting raw material data and cost to verify trade compliance.
- Consolidated monthly spend data into executive summaries and plant-level KPI scorecards for CEO/Board level reporting; track CRU commodity pricing (steel, aluminum, copper) and cost savings initiatives across the company.

AI Process Automation & Innovation

- Designed and built a spend intelligence hub that uses AI to transform raw procurement reports into automated visual and trend insights, expanding into a department wide AI roadmap with 12+ additional applications in progress.
- Automated late PO/negative availability tracking through 5 Power Automate workflows integrating SourceDay (Snowflake) with internal databases, delivering personalized weekly worksheets to buyers and performance summaries to managers over high-risk purchase orders and parts.
- Transformed Service Center negative parts availability tracking with an excel model, converting raw data into a readable weekly report for stakeholders; reducing negative availability from 20% to consistently below 4% week over week, with monthly AI trend analysis to flag chronic shortage parts.
- Used SQL to extract and merge millions of lines of PO/lead-time data from SourceDay, leveraging AI to evaluate ERP lead-time accuracy across the supplier network.

Verta LLC | Co-Founder | Jan 2025 – Present

- Co-founded a government contracting venture based on analysis identifying market inefficiencies in small business set-asides (FAR 19.5), where a significant number of contracts receive only a single bid.
- Conducted due diligence for each proposal by analyzing supplier pricing and calculating project costs to determine bid viability and potential profit margin.
- Assessed execution and compliance risk for federal small business set-aside proposals, evaluating regulations and capabilities before bid submission.

H-E-B DC Automation Case Study, University of Arkansas | Fall 2026 – Present

- Evaluating automation and ergonomic solutions to reduce injury risk and improve Partner safety in H-E-B's refrigerated DC operations, presenting findings and proposed solutions to sponsor stakeholders.

IANA Razorback Case Study Competition, University of Arkansas | Spring 2026

- Led a 5-person team's cost model analysis for a reshoring decision, evaluating manufacturing capacity, tariffs, carrying costs, transportation, and service penalties across 11 states and 1M+ units annually.
- Presented cost analysis, a state-by-state breakdown, and a board level recommendation to a judging panel of executives from Walmart, Sam's Club, Tyson, and J.B. Hunt.

Fit2Run | Bradenton, FL | DC eCommerce & Receiving | May 2024 – Aug 2024

- Managed daily inbound logistics for a high-volume distribution center, processing 10,000+ inventory units daily and identified a software bottleneck in the receiving workflow.

Skills & Interests

- **Technical Skills:** Excel, Power Automate, Power BI, ERP, SQL, AI Data Analysis
- **Compliance Knowledge:** USMCA, HTS Codes, Section 232/301 Tariffs
- **Interests:** Artificial Intelligence, Pickleball (University Club Team)
